Gary, IN 46406

Dear Mr. Hagen:

Re: RCRA Subpart F Groundwater Monitoring

This letter is to request a written update on the hazardous waste operating status of Gary Land Development Facility, located in Gary, Indiana, within ten days of receipt of this letter. Specifically, have you operated a hazardous waste landfill, surface impoundment, or land treatment facility at any time since November 19, 1980? If you have received a delisting variance from EPA exempting your facility from the requirements of 40 CFR 265, Subpart F, you must still apply to the Environmental Management Board at the Indiana State Board of Health to receive a State variance and a waiver from groundwater monitoring. A copy of the delisting letter from EPA or similar evidence of their action and a State variance application should be submitted to this office.

If you have qualified for interim status and you operate (or operated since November 19, 1980) a surface impoundment, landfill, or land treatment facility that manages hazardous waste, you are subject to the RCRA Groundwater Monitoring Requirements of Subpart F of 40 CFR 265 and 320 IAC 4-6. If you have not implemented a groundwater monitoring program, you are, therefore, in violation of said regulations and enforcement action is forthcoming.

If you have any questions regarding this correspondence, please contact Mr. Robert Downey at 317/633-8476.

Very truly yours,

Karyl K. Schmidt
